

A robust plug-in for Adobe InDesign to automate product catalog page creation. Considerably reduces time to publish catalogs. Simple interface, easy to learn, get instant productivity.

InStudio Features

AutoFlow to create entire catalog

- True InDesign plug-in system that provides greater control over page layout
- Automatically controls and applies fonts, colors, styles to the data. Saves time and effort for graphic designers
- Fast and reliable creation of complex documents
- Creates regular and complex pivot tables and applies styles to tables as defined
- Create and apply custom business rules using built-in scripting support

Drag & Drop To Create Customized Catalogs

- Drag and drop data from database to InDesign pages
- Preview catalog content before placing on page layouts
- Create custom catalogs, smaller catalogs and flyers without changing the structure of the data
- Optional Template based page creation to generate hundreds of pages quickly

True Bidirectional Data Update

- Update data from database in the page or make a change in the page and update back to database
- Works on Mac & Windows based InDesign software
- Integrated with CatalogStudio
